[GitHub: https://github.com/shivanand9019](https://github.com/shivanand9019) | [LeetCode: https://leetcode.com/shivanandmadar90](https://leetcode.com/shivanandmadar90)

Professional Summary

Information Science student skilled in Java, Spring Boot, REST APIs, and backend development. Built scalable backend applications and solved 100+ LeetCode problems. Interested in software engineering and backend development internships.

Technical Skills

Languages: Java, SQL, JavaScript

Backend: Spring Boot, REST APIs, Maven

Databases: PostgreSQL, MySQL

Tools: Git, GitHub, Postman, Render

Core CS: OOP, DBMS, Operating Systems, Data Structures and Algorithms

Coding Profiles: Solved 100+ LeetCode problems focused on Data Structures and Algorithms

Projects

URL Shortener System | Java, Spring Boot, PostgreSQL |

GitHub: <https://github.com/shivanand9019/url-shortener-system>

Live Demo: <https://url-shortener-system-avm1.onrender.com/>

- Developed a scalable URL shortening service using Java, Spring Boot, and PostgreSQL with support for custom aliases, expiration-based links, and click analytics.
- Built RESTful APIs for URL creation, redirection, and analytics with proper HTTP status handling and exception management.
- Implemented unique short-code generation with collision handling and database-level validation for reliable URL mapping.
- Designed expiration logic to automatically invalidate expired links and return HTTP 410 responses.
- Deployed the application and resolved production-level configuration and debugging issues.
- Optimized backend structure for scalability and future integration of caching mechanisms like Redis.

RestJobApp - Full-Stack Job Portal Application | Java, Spring Boot, React, PostgreSQL |

GitHub: <https://github.com/shivanand9019/RestJobApp>

- Developed a full-stack job portal application with scalable backend architecture using Spring Boot.
- Built RESTful APIs for job posting, application management, and CRUD operations with proper HTTP methods.
- Integrated React frontend with backend services using Axios for API communication.
- Implemented centralized logging and request monitoring using Spring AOP to improve debugging and maintainability.

Blood Donation Management System | Java, Spring Boot, JPA, MySQL |

GitHub: <https://github.com/shivanand9019/DB>

- Developed backend APIs to manage donors, blood requests, and inventory availability tracking.
- Integrated Spring Data JPA for database operations, entity relationships, and validation handling.
- Implemented exception handling and input validation to ensure reliable API behavior.

Education

University of Visvesvaraya College of Engineering ,Bengaluru

Bachelor of Technology in Information Science and Engineering

CGPA 8.67

2023-2027

Karnataka Science College, Dharwad

Department Of Pre-University Education (class XII)

percentage-88.33

2021-2023
